

Lasers

Lasers Bird devices use their Laser beams to seek out birds roosting-spots, alarming and confusing them, causing them to flee. This technological breakthrough is a proven method of bird control for most large commercial areas

All of these units work well indoors and outdoors in: hangars, warehouses, plants, tunnels, loading docks, boat houses, underpasses, storage sheds, barns, sports arenas, convention centres, parking garages and farmers fields.

Blazer 30 (Mini)

\$300.00

Price includes taxes and shipping

This unit has enough out put power to create stunning laser effects to deter most birds in small to medium-sized areas. Key Lock out System, sealed lens for laser protection, will hang anywhere.

Features:

- Unit comes with 50 deterrent laser patterns and 200 different kinds of laser effects.
- Laser will automatically shut down under "Sound Active" mode.
- This laser light is perfect for small areas, rooftops, trees and more.

Specification:

Laser Output Power: **30mW 532nm Green**

Diode Type: DPSS Laser Diodes

Scanner: Micro-step Motor, big angle scanning

Scanning Angle: +/-30

Power Consumption: 30W

Power Supply: 100V~250V AC, 50/60HZ

Packaging Size: 10.8×7.2×5.8 inch

Safety Standard Apply to: CE, ROHS

Gross Weight (including packaging): 2.4 kg

Blazer 50 (Super) \$500.00

Price includes taxes and shipping

Equipped with a **50mW Green Laser Light**, this unit packs even more laser power doubling the area you want to protect. Eye bolt locking device, remote control, Key Lock out System, sealed lens for laser protection, Top bar for hanging.

Features:

- **15K high speed optical scanner**
- Built-in 128 different kinds of laser beam types and graphic patterns.
- **Sound active, auto-beam, auto-animation, DMX512(12 channels), master/slave, remote control. (no ILDA function)**
- Patterns include blanking, frequently flashing, rotating, moving, billowing, zooming, drawing & etc.
- Laser will automatically shut down under "Sound Active" mode
- "Sound Active" mode; with no signal under "DMX512" mode; no signal when it is

Specification:

Laser Output Power: **50mW Green (532nm) Laser**

Scanner: 15K Optical High Speed Galvo Scanner, +/-30 degree

Power Consumption: 50W

Power Supply: 100V~250V AC, 50/60HZ

Packaging Size: 13×12.6×8.9inch

Package Weight: 3 kg

Blazer 50 Mega (Mega Fat Beam) **\$1,500.00**

Price includes taxes and shipping

BLazer 50 (Mega Fat Beam) is a Class 3R diode “fat beam” laser featuring strong 10 milliwatt (mW) green beams -- green is shown to be the most effective against pest birds. The beams create 45 different patterns occurring in random order. BLazer 50 can be operated off of 110v or 220v. It comes with a six-foot power cord, 2 keys, remote control, mounting hardware (consisting of hanging bracket, 2 clamp levers and 2 washers) and an instruction manual.

If desired, block unwanted beams (the beams that would normally point down, for example), by adjusting the thumbscrews on the metal “door” covers on the front aperture.

Remote Control & On-Unit Control: range of approximately 90 feet.
We estimate coverage of 10,000 square feet.

Features:

- Laser Power: 10mW FAT BEAM
- Unit Power: 50 watts
- Laser Color: Green
- Net Weight: 9 lbs/4Kgs
- Power: AC 100V~120V or 220V~240V, @ 50/60Hz
- Electric Current: 110v = 0.45 amps 220v = 0.23 amps
- Classification: 3R
- Size (mm): L220 × W280 × H172
- Fuse: 20mm×2A slow-blow
- Housing Metal
- Beam Divergence: < 1.5 mrad
- Operating Temperature: 64-77°F/18-25°C
- Safe Temperature for Use: 41-104°F/5-40°C
