

# UltraSonic Impact (Balcony)

## INSTRUCTION MANUAL:

This adjustable-frequency, dual-operation, weatherproof unit repels all pest birds. An infrared motion sensor is built in.

### SET-UP

- Pull off the back cover.
- Set Ultrasonic Switch to desired operation.
- Set Strobe light switch to either on or off
- Adjust sensor and sonic volume dials.
- Turn the frequency dial to the desired pest.

**AC Adapter** Plug one end into the port underneath the Frequency dial and the other into any standard outlet. (If using outside, protect the outlet from weather). Run the cord through the notch on the bottom or side of the unit. Snap the cover back into place.

**Batteries** Install four "C" batteries as shown on the unit. Snap the cover back into place. (Batteries not included)

Expect coverage up to 5000 square feet depending on obstacles. The speaker projects sound on a horizontal plane in one direction.  
Lower sound frequency obtains the greatest coverage.

Keyhole slots on the back for mounting

Ear damage may occur if exposed for an extended period of time at a distance of less than 10 feet. If sitting or working within range of the unit, you turn it off.  
Do not place the unit in or near water and do not mount it while standing in or surrounded by water.

Manufacturer's Warranty: Unit is warranted against defects in materials and workmanship for a period of six months from the shipping date.

### SPECIFICATIONS

Power Supply: 4 x 1.5V "C" batteries, 120 V AC adapter, working Current: <200 mA  
Ultrasonic Frequency: 15 kHz -30 kHz (adjustable) ,Effective Range: 5000 square feet ,Output Sound Pressure: 90 dB @ 1 meter

### 4 function Remote Control:

- Standby:** Turns the Yard Sentinel RC on or off. Remote control distance of up to 75 feet.
- Turbo:** We have designed this button for your safety. When activated, the Turbo button turns on all functions for 20 seconds. For example: an intruder or a large animal enters an area and you are not able to contact anyone for assistance. The Turbo can cause the intruder or animal to be startled, giving you time to get help.
- Ultrasonic:** Pressing the button once will set off the ultrasonic signal. The ultrasonic can alert a pest as it enters your property.
- Strobe:** Upon pressing the button once, the strobe light will flash for 20 seconds. The strobe light function is very effective against birds. It can also keep nocturnal pests such as squirrels, mice, rats, skunks, cats, dogs and other animals away.
