

Bird Free 4-S Gel

New technology has allowed us to produce an Eco-friendly bird repellent gel, which is harmless to birds, animals and humans.

Our 4-S Gel repels birds by stimulating all bird senses. Visual, Scent, Touch & Taste.

UV light makes the Gel look like fire in bird's eyes. Sweet smell of cinnamon to humans, but a sour deathly smell to birds. Bird Free 4-S Gel is sticky to a birds touch and tastes like sour grapes. Best thing is that 4-S Gel is made from all natural food-grade materials.

The micro encapsulation, formula technology gives the gel a 2 to 4 year life span. An oily film on the gel's surface protects the gel from the rain and other extreme weather conditions.

Bird Free 4-S Gel is set into small dishes (provided), then the dishes are either placed, hung or secured with magnets or caulking in the infected areas avfter cleaning.

One tube of Bird Free 4-S Gel (15 dishes provided) will cover a straight run up to 45 feet or an area up to 500 square feet.

This is NOT a clear sticky gel that is harmful to birds!!!
